COLMA MAN INJURED IN DUEL WITH BANDITS

Joseph Martini, cafe man of Colma, fought a desperate gun battle with three auto bandits at daybreak last Tuesday morning, while his wife and 10-year-old son looked on with horror from a window in their home above the scene of the conflict. Martini was severely wounded by the bandits and now lies in a hospital in a critical condition.

According to a reliable report of the attack upon Martini, the bandit trio swung around the corner in their automobile and opened fire just as Martini was entering the gateway of his home at No. 2 Moltke street, Colma. He carried $200 on his person, the receipts of his roadside cafe and soft drink parlor a mile south of Colma.

Attacked from the back without the least warning, Martini pitched forward at the first shot, a bullet splintering the bone of his left leg. Mrs. Martini and her little son, at the first sound of the shooting, rushed to the window in their night clothes and witnessed the unequal battle.

Martini painfully raised himself to one knee and drew his revolver. His first shot crashed through the windshield of the automobile, but apparently missed the occupants of the bandit's car. Crouching in the tonneau the bandits returned fire. Martini answered with another shot.

In the dim morning light the wife above watched his swaying figure, while the boy clung to her arm. Suddenly a volley of shots broke from the machine, and she saw her husband half stagger to his feet and reel backward, clutching at his waist.

The bandits drove away and the injured man was taken to to the South San Francisco hospital, where physicians hold slight hope for his recovery.

Chase for the bandit car was in full swing within twenty minutes after the shooting, but no trace of them has been found.

ST. MAXIMUS GIRLS' CLUB SELECTS NEW OFFICERS

Last Tuesday evening the St. Maximus Girls' Club held their monthly meeting in their club rooms and elected the folowing officers: Mrs. George Rodney (nee Helen Rider), president; Miss Marg O'Connor, vice-president; Miss Ada Johnston, secretary; Miss Louise Segale, treasurer; Miss Anna Kennedy, marshal.

The members of the club presented their past president, Lorraine Wall, with a beautiful pair of pearl rosary beads, as a token of their appreciation for her good work and efforts during her term.

A large number of new candidates were enrolled and the club enjoyed a very interesting meeting.

The next monthly meeting will be held on Tuesday evening, July 27, at 8 o'clock, in the club room, adjoining the church. At this meeting the new officers will be installed, also initiation of candidates and a social after the meeting. All young women in the parish are invited to attend.

RECENT BRIDE GUEST AT MISCELLANEOUS SHOWER

Last Thursday evening Mrs. Christine Hume acted as hostess at a miscellaneous shower given at her home on Miriam street in honor of Mrs. George Rodey (nee Helen Rider), who had just returned from her honeymoon. At midnight a delicious supper was served, which was prepared by Mrs. Hume and her mother, Mrs. Michaelson, the dining room decorations being pink and yellow. The bride received many beautiful gifts from her girl friends. The evening was enjoyed by the following: Misses Ada Johnston, Margie O'Connor, Kathryn Reegan, Tessie O'Connor, Grace Johnston, Jennie Panelli, Mae Panelli, and Mesdames Christine Hume, Lorraine Wall, Loretta Johnston and the guest of honor, Mrs. Rodey. The young couple have moved into their own home on Wellington avenue. Their many friends in the community wish them much happiness.

SHACKS BEING TORN DOWN FOR BETTERMENT OF CITY

It has been noticed that a number of the old refugee shacks have been torn down within the last few days. This action is paving the way for a bigger and better city.

It is the policy of the Daly City health department and the city marshal to try not to work any hardship upon poor families who may be now living in some shacks. But when unoccupied shacks become unsightly and unsanitary, such places are sure to be condemned, in order to make this a cleaner and better city in every way.

PLANS PROGRESSING FOR CELEBRATION OF FOURTH

The committee appointed to look after plans for the celebration of the Fourth of July in this city in 1927, have decided to give the different organizations more time to think of plans and select their delegates.

On July 21, the first meeting of this committee will be held, and those who are sponsoring the project want the two delegates from every organization to be present at that meeting.

The meeting will be held in the trustees' room at the City Hall.

If enough organizations send representatives, the board of trustees will go ahead with the plans for the celebration, but if the people are not interested enough to send representatives, it is announced that all plans will have to be dropped.

Special mention should be made of the organizations which have already taken enough interest to appoint their representatives. They are the Colma-Vista Grande Aerie, Fraternal Order of Eagles, who have appointed S. Pfeifer and J. Reardon to represent that organization, and the Eagles' drum corps, who have apointed W. Bolger and A. Palmazona.

If you want to see Daly City as the host to all the other communities of the county at a monster celebration of Independence day in 1927, now is the time to do a little missionary work. See that the organization, lodge or church with which you are affiliated has its representatives at the meeting to be held at the City Hall on July 21 next.

WOMAN FINED FOR SELLING FIREWORKS

From all indications those who engage in the sale of fireworks in this city will do so at their peril.

Mrs. George Smith, 5881 Mission street, was arrested this week for selling fireworks. A raid was made on her store near the county line by City Marshal Doyle, who took over $450 worth of fireworks, and Mrs. Smith was assessed a fine of $25 for breaking the city ordinance. Marshal Doyle is determined that Daly City is to have a safe and sane Fourth.

It is said that complaints have been made by the San Francisco police department of fireworks being bought in Daly City and used in San Francisco. It is expected that they will have no cause for complaint in the future.

The city trustees have passed an ordinance prohibiting the selling of fireworks in this city, and it is up to the people to uphold this law. They have requested the officals of San Mateo county to stop the sale of fireworks in all other parts of the county.

GRACE PRESBYTERIAN CHURCH

Phone Delaware 1544.

The Daily Vacation Bible School started off Monday morning with about forty pupils enrolled for the classes and work and a jolly good time is being enjoyed by those attending.

The subject of Sabbath evening will be, "Make it Like the Pattern." You will find a real welcome and a very interesting hour if you will come with us on Sabbath evening.

The chief curse of the present age is that so few people see any wrong in the thing which they wish to do and say.

The services last Sabbath evening were very interesting, and a splendid audience came to listen to the sermon on "Freedom," and some went away from the meeting with a different ception of the gospel and the work of the church than when they came.

If you have an attack of real religion it will be contagious.

The four course dinner served by the Associated Manufacturers' of the city to the people and friends of the Grace church on Wednesday was enjoyed by a very large attendance, and all united in praising the liberality of the Manufacturers and will promise that should another occasion present itself a larger crowd will avail themselves of the good eats provided. We can but say—Thank You.

The biggest cemeteries are the ones where unused talents are buried. Are you in that one?

Girls' Club Selects Officers

Election of officers took place at the last meeting of the Girls' Club of St. Maximus church, on Tuesday evening, June 21. The club was divided into two branches, Junior and Senior, all married women belonging to the Senior and all others to the Junior. The newly elected officers of the Junior brach are: Marie Shaw, president, and Henrietta Bleasdale, vice-president. Because of the responsibility placed on the secretary-treasurer, the club decided that Father Donohoe should appoint her. He therefore appointed Gertrude Murphy, because he believed she was the best one present to fill the vacancy.

FINAL SCHOOL REPORT INDICATES INCREASE

To those who take the right kind of interest in public affairs, the annual report of the year's attendance at the schools is always of more than passing interest, as it is an indication of how we are doing.

Of course it shows increase. Almost without exception for twenty-seven years it has shown the same in this district.

Last year the average daily attendance was 1,101, and this year it is 1,168, an encouraging increase, but not one that causes any trouble to provide additional rooms or teachers, for the number of graduates this year is 119.

An average daily attendance of 1,168 secures for the district an income of $63,480, and according to the budget for the coming year about $10,000 more is needed. The deficiency may be overcome by taking advantage of laws providing for additional taxation.

For the first time in several years we have come to the end of the school year entirely out of debt, but with no balance left over. This fact is one that should cause general rejoicing.

There was one year in the past when all the teachers and janitresses received no pay for the month of June, on account of heavy indebtedness.

According to localities the average daily attendance is as follows: Woodrow Wilson, including Vista Grande, 166; Colma, including Thornton, 377; Crocker Tract, including Pershing, 325.

The growth in three other localities of the county has been more rapid than ours. Both Burlingame and Redwood City have about caught up with us, in average daily attendance, and San Mateo has a lead of nearly 200.

There are many reasons for believing that next year will show in this district a greater increase, for the large number of new houses means a pronounced increase in population, and consequently more children at school.

BOARD REJECTS BIDS FOR NEW AUTO SHOP

At the regular meeting of the high school board of trustees last Wednesday evening, many important matters were discussed.

Miss Helen Reveal was hired to fill the vacancy caused by Mr. Mork's resignation. She was formerly head of the commercial department at the Willits Union high school, Willits, California. For ten years she has been doing commercial work, not only in teaching but in actual experience. Besides being the head of the commercial department at Willits, she was also the vice-principal. Her recommendations are high and we hope she will be as successful as her predecessor.

A special meeting was held Saturday to open bids on the new auto shop. At that time there were three bids offered, the highest, by the West Coast Construction Company, for $25,900, and the lowest by the Fred W. Segrist Company, for $17,900.

These bids were taken under consideration until another special meeting to be held Tuesday. On Tuesday the board voted to reject all the bids and to revise the plans in order to bring the bids to a lower figure.

LOCAL WOMAN HONORED BY NATIVE DAUGHTERS

Mrs. Josephine T. Johnson was re-elected Grand Trustee of the Grand Parlor, Native Daughters of the Golden West, at the convention held in Sacramento this week, the election of officers taking place on Wednesday. Mrs. Johnson has a host of friends in Daly City and Colma who will be pleased to learn of this honor given a loyal worker in the cause of the Native Daughters of the Golden West.

BUILDING PERMITS

City Clerk B. C. Ross reports the issuance of the following building permits:

Mr. Cairns, 199 Knowles avenue, alterations.

Stephen Passafiume, 667 San Diego avenue, alterations and garage.

W. C. Merritt, 270 Vista Grande avenue, four rooms and garage.

F. J. Markey, 467 Bellevue avenue, alterations.

Postoffice Again Changes Hands

Mrs. Mary K. Davis is again postmistress of San Carlos and has moved the postoffice to its former location on the state highway, the site from which it was moved some months ago by Mrs. Lena Gorse, who succeeded Mrs. Davis as postmistress.

DALY CITY RESIDENT AVERTS CAR CRASH

Another serious accident on California street, San Francisco, was averted by the quick wit and action of Peter Shearer of 298 Templeton avenue, Daly City, when he leaped to the running board of his heavy gasoline truck when it broke away down the steep California street hill at Powell, swerved the wheel just as it was about to crash head-on into a crowded cable car, and was himself thrown beneath the wheels of the truck.

The truck careened on down the hill, narrowly missed the machine of W. Smith, 1020 Post street, a composer and radio star, dashed up onto the sidewalk at Stockton street, running over Lee Gong, 860 Stockton street, Chinese, and crashing into a fire hydrant, where it halted.

Gong was taken to the hospital, where it is said he may die. Shearer was rushed to the Central Emergency hospital, suffering from a crushed arm and serious cuts and bruises as a result of his attempt to stop the runaway machine.

The machine broke away while Mr. Shearer was serving gasoline to a garage at California and Powell streets. But for his quick action it is probable that another wreck would have occurred that would have resulted in a heavy loss of life.

HUNDREDS PAY TRIBUTE TO CONGRESSMAN FLAHERTY

"Lawrence James Flaherty was a man of upstanding character. He devoted his dife to the service of his country, his state and his fellow man. His devotion was exemplified by the way he continued with his work as a congressman, despite the fact that he knew a year ago that he had but little chance to live long."

With such words of heart-felt praise, Mayor Rolph on Tuesday delivered a funeral oration over the body of Congressman Lawrence J. Flaherty, in the rotunda of the City Hall, at San Francisco, while several hundred government, state and city officials and representatives of labor and fraternal organizations bowed their heads in memory of the deceased.

Frank C. McDonald, president of the State Building Trades Council, also spoke on the late Congressman Flaherty's untiring work as a city, state and national official in the interest of laboring men and their families.

After the orations had been delivered, a large and impressive funeral cortge formed in front of the City Hall and escorted the body to Saint Mary's Cathedral, Van Ness avenue and O'Farrell street, where solemn requiem high mass was held.

The mourners then, in motor cars, accompanied the body to Holy Cross cemetery, where interment was made.

PETTING PARTY BANDITS STILL HAUNT HIGHWAYS

Bandits who have spread a reign of terror over San Mateo county roads, during the past few weeks, struck again Tuesday night near Menlo Park, when they tore a diamond ring from the finger of a young woman, after robbing her companion, John L. Kirton of Palo Alto.

How many couples the "petting party" bandits have victimized, the authorities have been unable to determine, since many of the young couples held up in lonely spots along the roads have doubtless failed to report, is is believed by the police.

Kirton told this story, however, declaring he had been robbed of $40 in cash and that a diamond had been stripped from the hand of his fair companion, whose name was not given in the report. The holdup occured just south of Redwood City, where the couple had parked their car at a lonely spot, Kirton said.

PULLMAN CAR HEIRESS BREAKS CAROLAN WILL

Mrs. Harriet Pullman Carolan Schermerhorn, the "Pullman car heiress," on Tuesday won her court fight to break the will of her late husband, Francis J. Carolan, peninsula society figure, who died in 1923.

The net effect of the decision of Superior Judge George H. Buck at Redwood City will be to deprive the state and federal governments of approximately $100,000 in inheritance taxes. Mrs. Schermerhorn's victory means that the Carolan estate will be wiped out by the return to her of property which Carolan held in trust for her, and thus there will be no inheritance tax collectible.

The widow's suit was based on the contention that Carolan, a $250 a month clerk at the time he married into the immensely wealthy Pullman family, had no means of his own, and that the million dollar estate which he left consisted of property belonging to his wife.

EDITORS ENTERTAINED ON TOUR OF P. G. & E. PLANTS

Last Saturday and Sunday more than 200 Central and Northern California editors were given a glimpse of the distributing systems of the Pacific Gas and Electric Company in the bay cities, and made acquainted with the distribution side of the business conducted by the P. G. & E.

The visiting newspaper men, many of whom had previously been shown the production side of the business in excursions to the Pit river and the Lake Spaulding plants, were taken on a tour of inspection of the company's equipment in San Francisco and Oakland.

The greater portion of Saturday was spent in visiting the load dispatcher's office in Oakland, where the power is directed wherever needed on the company's system, the Emeryville laboratory and shops, and the Claremont substation, while Sunday morning the steam generating plant at the foot of Twenty-second, in San Francisco, was visited.

The visiting editors were entertained at dinner at the Clift Hotel, San Francisco, Saturday night, when an interesting address was made by President Wiggington Creed, of the Pacific Gas and Electric Company. Following the dinner the editors were entertained at a theatre party at the Curran theatre, and later made an inspection of the company's general offices in San Francisco.

EXPENDITURES EXCEED REGULAR STATE BUDGET

Governor Richardson and the state board of control have granted deficiency allowances totaling $327,555 to eleven self-supporting state departments and agencies during the last eight months, permitting their expenditures to exceed the regular state budget appropriations by that amount, a check of the records at the state controller's office reveals.

The expenditure grants over and above the governor's budget appropriations approved by the last legislature are listed on the controller's records as being for departmental salaries or support, or both, the signed deficiency order stating in the case of practically every department that the regular appropriation "has been shown to be inadequate to properly finance the needed expenditures for this depatment."

Deficiencies of this type are permitted under a State Supreme Court budget decision, which held that each self-supporting department must live within its fixed budget allowance, but that the governor and the board of control may, if it appears needful, approve additional expenditures of departmental revenues. Such deficiencies, it was learned, do not require legislative consideration.

The governor and his finance board have approved seventeen deficiency appropriations for eleven departments since last October, the latest, for the State Banking department, having been granted this month.

SUNSET REZONING PLAN IS DISCUSSED

Proponents and opponents of rezoning 32 blocks of streets in the Sunset district from residental to commercial gathered at a hearing before the city planning committee of the supervisors Monday, and, after all had had their say, Chairman Milton Marks announced a decision would be rendered in about two weeks and some recommendations made to the supervisors at that time.

The project has been before the supervisors and was sent back to the committee for further study. Some requests were made to add blocks on Quintara street to the proposed commercial district and some protests were made against making part of Vicente street commercial. The Sunset Transportation and Development Association endorsed the scheme of zoning a number of blocks now, in advance of any great demand for commercial property.

NEGRO SOUGHT FOR SLAYING IN CARD GAME CONTROVERSY

Search is being made for James Cole, South San Francisco negro, following a coroner's jury verdict in which he was held responsible for the death of John E. Pinckney, also colored. Pinckney was found seriously wounded on June 12, and Saturday he died at the County Community hospital. Before his death, Pinckney maintained that he had stabbed himself, but Chief Belloni, of South San Francisco refused to believe him and secured evidence which convinced the jury that he was slain by Cole, as the result of a quarrel over a card game, Cole accusing Pinckney of having used marked cards.

TRAFFIC OFFICERS OF COUNTY KEPT BUSY

Captain James Logan of the San Mateo county traffic squad reported to the county supervisors at their meeting last Monday that his men had traveled 10,434 miles over the the county highways in May and had arrested 631 persons for violations of the motor vehicle laws. Of this number 524 were for faulty lights. Total fines collected for the month amounted to $412.50. The report of Captain Logan would indicate that the traffic officers of the county have been kept busy, and their record is a most satisfactory one.

The Camp Fire Girls of San Mateo county are going to have a permanent camp of their own in the County Memorial Park. The camp will be equipped with a club house and other features similar to the camp now being prepared for the Boy Scouts in the park. Permission for the establishment of the camp was granted by the supervisors Monday morning at their meeting in Redwood City, when Mrs. Mildred Lipp of San Mateo appeared before the board and presented the plans of the Camp Fire Girls. Supervisors Rosalie Brown, C. V. Thompson and T. L. Hickey were appointed a committee to visit the park with Mrs. Lipp and select a definite site for the camp.

A protest against the moving of the railroad crossing at Beresford was received by the board and the matter continued until July 6.

The new county milk ordinance was read and action postponed until July 6, on advice of District Attorney Franklin Swart.

Purchasing Agent Ernest Werder was instructed to purchase an electric sign for erection on the highway at the entrance to the Community hospital. The sign will measure 6 feet by 33 inches and will cost $187 without wiring or installation. The words "Community Hospital" will appear in big white letters and a red hand will direct the way to the building from the highway.

The board unanimously endorsed and commended the action of coast-side boosters in offering a reward of $50 for the best slogan for use in describing a scenic drive through the beauties of that section of the county.

A petition for the formation of a lighting district in Ravenswood was set for hearing on July 6.

Letters from the Lomita Park fire district asking the appropriation of $1,500, and from the Menlo fire district, asking for $12,000, were referred to the county auditor.

PERSISTENT FOE OF BASS FINED FOR ILLEGAL FISHING

Winding up what he declared to be the most persistent case of law violation against striped bass, in San Mateo county, State Game Warden Jack Burke, of Daly City, yesterday secured two confessions from Antone J. Anderson, fisherman, followed by pleas of guilty entered by Anderson in two San Mateo county courts.

Anderson, who lives in Crockett, was taken into custody eleven months ago by Burke for illegal bass fishing in San Francisco bay. Using a net a mile in length and 12 feet in depth, Anderson was literally exterminating the great schools of bass on the breeding grounds off the San Mateo county bay shore, Burke declared.

Anderson employed counsel, demanded a jury trial in the court of Justice Ray Griffin at Redwood City and secured a disagreement of the jury at his first trial. He was released on $500 bail. While the case was pending, Anderson secured another net and went back to his illegal fishing, he admitted yesterday. But Burke was watching, and another arrest followed. This was about a week ago. Anderson was haled into the court of Justice Ellis C. Johnson, Daly City, and again entered a plea of not guilty, demanding a jury trial.

But, facing a second trial, Anderson decided to change his plea after a talk with Burke, who told the fisherman that he would be arrested just as often as he undertook to net bass in the bay. Anderson entered a plea of guilty in the court of Judge Johnson and accompanied Burke to Redwood City, where a plea of guilty was entered in the former case. Fines of $100 were collected for each offense and Anderson promised the courts he would never again fish illegally in San Mateo county.

Woman Run Down on Highway

Mrs. Nancy Lamb, aged 42, was killed at San Carlos Wednesday when she was run down by an automobile driven by Carl E. McClellen, painting contractor of San Jose. According to witnesses of the accident, Mrs. Lamb who was waiting for a bus, stepped in front of the car driven by McClellan, who was proceeding at a moderate rate of speed. McClellan was arrested, but was later released.

PERMANENT MARKING OF PEDESTRIAN PATHS

Among other recommendations contained in a recent traffic survey of San Francisco made by the National Automobile Club was the following:

"That all crossings and all stop lines for motor vehicles and street cars be indicated by steel plates or discs, each having a superficial area of at least 9 square inches, and to be not more than 12 inches between centers."

Eleven thousand of these markers have been installed at principal crossings in San Francisco and have proven a distinct success, as shown by the statement of Captain Gleeson of the traffic division of the San Francisco police department.

"Eleven thousand markers have been placed at stret crossings on Market street for the benefit of pedestrian traffic. The average number of pedestrian lanes at each crossing of Market street is six, and an average of 570 buttons have been used at each of the intersections."

The superiority of these buttons over the obsolete painting system is apparent, the main factor being that the lines are always in evidence, which was not the case with painted lines. Under the painting system it was not possible to paint as many lines as are shown by the present marker button system. It therefore follows that the efficiency of pedestrian lanes has been increased.

An example of relative costs might be given: On the installation of the buttons at the crossing of Market, Stockton, Ellis and Fourth streets, at which point there were six different pedestrian paths placed, the cost was $118. To have painted these pedestrian lanes would not have been possible at this same cost. Wages of painters on night time work, traffic interference causing more hours to be consumed in the painting of these lanes, would have made the cost of entire installation at least 30 per cent more than the installation cost of the marker buttons. Due to various causes, such as wear and tear of pedestrians and auto traffic, rain, fog, etc., it is estimated that these painted lines would have to be renewed at least four times a yer. A great saving will be in the permanency of this semi-steel safety marker, as when once installed it will last for approximately five years.

FOREST EXPERIMENT STATION IS ASSURED FOR CALIFORNIA

A forest experiment station for California was assured by the recent signing of the department of agriculture bill by President Coolidge, according to announcement from the United States Forest Service headquarters in San Francisco. Congress appropriated $30,000 for this purpose for the fiscal year beginning July 1. It is expected that the headquarters of the new station will be located in the San Francisco bay region. Assistant Forester Earle H. Clapp, of the Washington headquarters of the Forest Service, is expected in California about July 1, to make final selection of the station site and personnel. Plans call for a staff of five specialists who will conduct research work in fire prevention, timber management and the relation of brush cover to watershed protection.

CHURCH LITERALLY MAKES "CALL" BY LONG DISTANCE

When the congregation of the Marantha Christian church at Spokane, Wash., recently desired to secure a new pastor, the call was made and completed entirely by long distance telephone. By a unanimous vote of the members of the church, the Rev. I. E. Metcalf, of Dayton, Wash., was invited to take charge of the pastorate. The telephone was used to convey the news of the call to Mr. Metcalf, who accepted in the same way, and then tendered his resignation to the Christian chruch of Dayton, where he had been pastor for two and a half years.

When a fellow gets lit up and snubs an old flame, she is put out.

September 9, 1895, hydro-electric energy was first transmitted 21 miles from Folsom to Sacramento.

The Folsom plant was connected with a steam plant at Sacramento, giving that city two sources of supply.

This world-renowned achievement began the development of an electrical system that has materially aided agricultural, industrial, and social development.

Today, interconnection is complete from Oregon to Mexico, from Nevada to the Pacific. Surplus power is available where any shortage might exist. All sections of the state and its people are benefited.

Since 1913 the average per capita cost of living increased 65%, while the average cost of electricity decreased 8%.

FOUR STATE AGENCIES CO-OPERATE FOR PROGRESS

The Department of Labor and Industrial Relations, concerning which the average citizen has very little information, has filed an interesting report with Governor Friend W. Richardson. Representatives of four governmental agencies of the state comprise the personnel of the department: Industrial Accident Commission; Immigration and Housing Commission; Industrial Welfare Commission and Bureau of Labor Statistics. The report informs the Governor that the department has functioned in complete harmony, thereby enabling each of the agencies to do the most effective work. One of the chief benefits derived from the activities of the department is the coordination of the work of agencies represented and the consequent elimation of overlapping of functions. Some of the outstanding accomplishments by the four agencies embraced in the departments are set forth in the report:

Industrial Accident Commission.—While transacting a largely increased volume of business in all departments and without loss of efficiency, effected a saving of over $300,000 during 1922-24 budgeting period; secured enactments of amendment to compensation act requiring all employers to carry compensation insurance and increasing funeral benefits to $150 and making such benefits payable in addition to, rather than out of, awards to dependents; for fiscal year the number of cases filed with Commission increased 2.7 per cent while cases decided increased 12 per cent; staff of Department of Safety increased 31 per cent and number of inspections from 10,000 to 16,000; new safety orders issued and existing orders strengthened to meet changed conditions; State Compensation Insurance Fund maintained on a sound financial basis and in a prosperous condition; the Fund has paid to injured workmen and their dependents $13,000,000, has refunded to its policy holders over $9,000,000 and has accumlated a "rainy day" fund of over $2,000,000.

Bureau of Labor Statistics.—At no time since its establishment in 1883 has the Bureau been able to show greater progress; 33,801 labor law violations reported to and handled; wage complaints increased 29.8 per cent; complaints against private employment agencies 1,873, an increase of 38.5 per cent; complaints of violation of eight hour law 277, an increase of 31 per cent; during 1922-24 $858,163.85 unpaid wages collected, an increase of 90.6 per cent, resulting in a saving to workers of from $143,0000 to $215,0000 annually; number of criminal prosecutions started 294, an increase of 26.7 per cent; additional offices established at Oakland, Stockton, San Jose, Long Beach, Santa Barbara and San Bernardino; state free employment bureaus filled 474,691 jobs, an increase of 37.4 per cent and a saving in fees to workers of $489,000 in two years.

Industrial Welfare Commission.—Over 160,000 women and minor workers now enjoy benefits of eight-hour and minimum wage laws; number of establishments employing women increased from 3,244 to 5,120 in four years; in 1919 only 19.1 per cent of women workers received a minimum wage of $16 per week, whereas the average now is 94.3 per cent; wages collected from July 1, 1924, to May 1, 1926, $13,000; for the same period 3,600 pay roll and sanitary inspections were made; increased pay secured for overtime work where such work is permitted; women working as extras in the moving picture industry protected.

Immigration and Housing.—The complaint departments of the four offices maintained received 2,277 immigrant complaints and 1854 applications in 1925; housing department rigidly enforced the State Housing Law thereby securing a constructive program of housing relief; during 1925, the camp departments made 1,703 inspections of camps housing 87,538 persons; due to splendid spirit of co-operation by employers, only three arrests were necessary during the year.

AIRPLANE FOREST PATROL STARTED IN CALIFORNIA

Airplane patrol of the forested regions of California started June 2, reports the San Francisco office of the United States Forest Service. Planes will operate out of Mather Field, Sacramento, and Griffith Park. Glendale, under charge of Lieutenants Paul A. Andert and C. A. Burrows of the air service officers reserve corps, respectively. On June 16 forest airplane patrol started in the Pacific Northwest states of Oregon, Washington, Western Montana and Northern Idaho.

Airplane forest patrol was again made possible this year by a special appropriation of $50,000 by congress. Planes will be supplied by the U. S. army, and First Lieutenant Lloyd Barnett of Crisy Field, San Francisco, has been detailed to act os technical advisor and liaison officer. Pilots and mechanics have been selected from specially qualified officers and enlisted men of the air service reserve corps.

Airplanes will be used this year, state officers of the U. S. Forest Service, primarily for the reconnaissance of burning fires, for patrol duty following lightning storms, and for the transportation of emergency equipment to the fire line. Patrol service will be rendered, on request, to state officials and other agencies co-operating in fire prevention in the Pacific Coast forest regions.

The prize orator in the recent national contest in Washington said: "Without the Constitution there would be no flag, no united country, no justice founded upon law." And he might have added, no Eighteenth Amendment.

Congresswoman Kahn of California complains of jokes made at the expense of Congress, but we couldn't get our $10,000 worth a year out of some congressmen if they didn't amuse us occasionally.

It is reported that quite a few 1925 June brides are repeating this year.

Those who fish for compliments never let the big ones get away.

NORTHEAST HIGHWAY FOLLOWS SCENIC WAY

The lateral that extends from Red Bluff to Susanville is a route which equals in grandeur and scenery and interesting panoramas any road of its length on the coast, according to the National Automobile Club.

From an elevation of 300 feet at Red Bluff the road climbs to 5,000 feet at Mineral, and then drops down ino the valley in which lies Lake Almanor, which stands at the gate of Lassen Volcanic National Park. From Paynes street to Mineral the road is covered with lava rock that does not add to the smoothness of traveling, but from Mineral to Chester much better time can be made, and the highway winds in and out of wonderful stands of spruce and pine and cedar, with an occasional glimpse of the snow-capped volcanic cone of Lassen to the north, it makes a most attractive ride. From Chester, which stands at the head of Lake Almanor, to Westwood, the road climbs approximately 500 feet in a distance of eight miles, and then drops down again in the next twenty-five miles to Susanville, at an elevation of 4,195 feet, or approximately the same elevation as the valley floor of the Yosemite.

Susanville is the gateway to the picturesque scenery of the northeast section of California. A number of lakes are located in this region and to the north lie the lava beds of Modoc county, where for a long time a small band of Indians held out againsts the combined forces of the United States army of the Pacific coast. The entire route is one of attractive prospects with the background of fleece-crowned ridges and the forground of green forests and shrubbery of variegated hues.

Forty-three miles east of Red Bluff, 10,577 feet above sea level, stands the northern sentinel of the Sacramento valley, Mt. Lassen.

It Talks!

"IT *TALKS!*" exclaimed the astounded Dom Pedro, Emperor of Brazil, one June day in 1876, as he held to his ear the receiver of Alexander Graham Bell's telephone, then on exhibit at the Philadelphia centennial exposition, while the young inventor, some distance away, spoke into the transmitter.

Time has not detracted from the drama of this scene, nor robbed the emperor's tribute of its truth. Fifty remarkable years have passed. Important among their contributions to human progress has been the development of Bell's idea into a nation-wide, universal telephone service. But the wonder of the telephone is still that which arrested men's thoughts a half century ago—that it can talk.

Herein lies its unique value to the individual and the nation. It provides, as nothing else can, a means of speeding over great distances, privately and without interruption, the intimate, personal tones of the human voice. It projects personality. It unites millions of Americans, though separated by the breadth of a continent, into a single vast commonwealth of speech.

ATWATER KENT IGNITION *for Fords*

Thousands of Ford owners have found

that the Atwater Kent Type LA Ignition System for Fords lasts longest, is least trouble, means a smoother running motor, easier starting, picks up quicker and gives more power.

Of the same general character as the Atwater Kent Ignition Systems furnished as standard equipment on many of America's foremost cars, it is a complete scientific ignition system with twenty-six years' experience in making scientific ignition systems back of it.

As carefully made as an Atwater Kent Radio Set.

Installed in less than an hour.

Everlastingly dependable.

Type LA *Price* $10.80

Including Cable and Fittings

Lead Into Mercury

Lead has been transmuted into mercury by experiments conducted at Amsterdam by Professor Smits. The controversy over changing mercury into gold is still raging, but the lead-mercury transmution seems to have been definitely accomplished.

Watch Cuticura Improve Your Skin. On rising and retiring gently smear the face with Cuticura Ointment. Wash off Ointment in five minutes with Cuticura Soap and hot water. It is wonderful what Cuticura will do for poor complexions, dandruff, itching and red, rough hands.—Advertisement.

Footbridge for Tourists

Parts of the Grand canyon that otherwise would be inaccessible to travelers are easily reached by means of a narrow suspension bridge hung between the cliffs of the deep chasm. It is securely archored and high enough above the water to be out of danger in flood times. The passage is designed to accommodate pedestrians, horses and burros, and is reached by one of the trails leading from the top. —Popular Mechanics Magazine.

EVERY 20 YEARS COMES ACCIDENT

Statistician Figures Average Driver Can Expect Serious Accident.

The average automobile driver may expect to have a serious accident about once in twenty years.

But one or two per cent of the drivers should thank their special guardian angels if they don't smash a car or run down a pedestrian every six months or oftener.

This is the way drivers classify under today's standards and conditions, according to Dr. Walter V. Bingham, of New York, director of the Personal Research federation.

One of the large problems of highway safety, he says, is to recognize incorrigibles before they do any damage, and to banish them from the steering wheel.

Pick Out Repeaters.

Accident "repeaters" cannot be picked out by outward physical appearance, psychologists agree. There probably are just as many blonds among them as brunettes. They have no distinctive facial characteristics, or other earmarks.

"How, then, can you determine who will be predisposed to accidents before the subject begins driving?" The question was put up to Doctor Bingham, who was chairman of the committee on causes of accidents reporting at Secretary Hoover's recent safety conference, and also to Dr. F. A. Moss, professor of psychology at George Washington university and secretary of the same committee.

"There are personal factors which can be revealed by psychology laboratory test of the applicant for a driver's license," answers Doctor Bingham. "You can determine exactly how long it takes to act after an emergency is perceived.

"The average driver, we have found, requires about one-half a second in emergency to take his foot off the accelerator and put it on the brake. This means the car traveling at thirty miles an hour would go about twenty-two feet before the driver acted.

"Some types of nervous disorders unfit a person to drive, while others have no such effect. One eminent psychologist says that a person suffering from acute melancholia is one of the safest of all drivers, because he takes extreme precautions against accidents."

Extensive Tests Made.

Doctor Moss has made extensive tests into the personal factors which cause accidents. One of his tests was a simple device of "What's wrong with this picture?" to determine a perception of danger. He has applied the standard intelligence test to drivers also.

A high grade of general intelligence is not necessary to be a good driver, he demonstrated, but a subnormal mentality makes a dangerous driver. He found taxicab chauffeurs with the minds of seven-year-old children, and they were having trouble.

"A small number of people become chilled and quite helpless from fear when confronted by sudden emergency," says Doctor Moss. "We have located them in tests on students in the university."

"It is possible, also, to judge one's eye and hand co-ordination by tests. This is important in passing cars and driving up to curbs. These tests are quick and practical and will locate dangerous traits.

"Women are no more dangerous as drivers than men, given equal practice. They have no distinctive psychological tendency to accidents."

The influence of fatigue on automobile accidents, according to these authorities, is marked. A tabulation of 28,444 traffic accidents in New York state last year showed that more than twice as many accidents occurred during the evening rush hour as in the morning rush hour.

Watch Batteries Closely to Obtain Best Results

Every automobile owner knows that unless he oils his motor regularly and keeps his radiator filled for cooling, his engine will 'burn up' and refuse to do its work. He realizes, too, that unless the gears and bearings are lubricated periodically they will be out of commission in short order.

It is a peculiar fact, however, that many of these same motorists ignore the storage battery until it dies an unnatural death. They seem to think it will take care of itself. But if it is accorded as careful and regular attention as the car, many battery ills may be prevented.

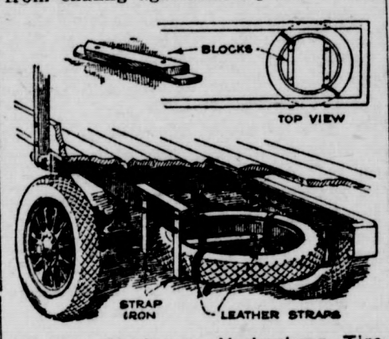
Storage batteries are like human beings in that they must have 'food' and 'drink' regularly or they will weaken and their lives be shortened. By 'food' is meant the current which must be put back by the generator.

Regular inspection will tell you the condition of your battery. If it is undercharged the specific gravity of the electrolyte will be 1,250 or less; if it is overcharged it will be over 1,300, and the battery will show signs of excessive heat and spraying.

The most common and ruinous abuse of the battery is to let it go 'dry.' The electrolyte solution must always completely cover the plates in all cells.

Pneumatic-Tired Trucks Hang Spare Under Frame

On many pneumatic-tired trucks the spare tire can best be carried under the frame behind the rear axle, as shown. The objection to this mounting is the difficulty of keeping the tire from chafing against the parts of the



Wooden Blocks on Underslung Tire Carrier Prevent Tire From Chafing.

carriage with which it comes in contact. A good method of preventing this trouble is to bolt two hard-wood blocks, cut as indicated in the detail, to the carrier. Two heavy leather straps are wrapped around the tire and carried at diagonal points to keep the tire on securely, and a heavy chain with a padlock is used to prevent theft.—G. C. Douglas, Raleigh, N. C., in Popular Magazine.

Motor Cars on Farms in Middle-Western States

Survey of farm-home conditions in sixteen middle-western states reveals that more than 50 per cent of the women in the district drive automobiles. On the other hand, more than 67 per cent still draw water from wells or pumps outside the house, and less than 28 per cent have sinks with drains in the kitchen. Less than 18 per cent of the homes surveyed had bathtubs; there were washing machines in more than 40 per cent of the homes, and in nearly 17 per cent the washers were run from the farm-power system. Only a little more than 11 per cent of the farm wives kept any kind of record of their expenditures.—Popular Mechanics.

Other Man Drives Your Car Better on a Hill

It invariably happens that when you let some one else drive your car he makes it perform better on hills than you can. There is no mystery to this. It's just a matter of feeding gas properly, and the stranger at the wheel does the right thing without knowing why he does it.

When you are thoroughly familiar with your engine you are likely to feed it too much gas at the wrong time. The stranger proceeds on the assumption that the engine will be equal to the hill and when it begins to slow down he gives it more gas.

AUTOMOBILE GRAVEYARD GOOD INVESTMENT

At Vintage, near Lancaster, Pa., Morris Roseman started an idea to work eleven years ago. It was to buy all the old automobiles he could get, dismantle them, and when anyone wanted parts to a certain machine, which was out of date, they would have to come to him. The idea was a success from the start. There are always over 400 old cars on hand in his "graveyard" as shown in this photograph at Vintage. His idea made him rich.

CALIFORNIA NEWS BRIEFS

William D. Frazier of Watsonville, 80-year-old retired rancher has just celebrated the sixtieth anniversary of his arrival in Watsonville. Frazier is blind. Otherwise he is as active and his mind is as keen as it was a half century ago. He came to San Jose by railroad, that being the terminus in 1866, and came into Watsonville by stage over Mt. Madonna. He found Watsonville a rough and ready village of between 400 and 500 persons.

Approximately 193,600,000 feet of timber in the Fandango logging unit of the Warner mountains, Modoc National Forest, have been sold to a lumber company in Denver, it was announced recently by Stuart B. Shaw, chief of the California district, United States Forest Bureau. The timber consists of approximately 74 per cent pine, for which the successful bidder offered $3,165 per thousand feet and 50 cents additional per thousand feet of fir, cedar and other species.

The proud boast of Dr. Herman N. Bundesen, Chicago city health commissioner, over the low mortality rate among young married men in the Illinois metropolis received something of a set-back recently when L. E. Ross, director of the State Bureau of Vital Statistics, at Sacramento announced that from the standpoint of longevity the average Californian, married or single, puts Dr. Bundesen's wedded Chicagoans completely out of the running. Holding that marriage makes for long life, Dr. Bundesen announced that "out of every 1,000 Chicago men from 25 to 34, those who die include 15 who are divorced, 5 who are single and 4 who are married. But, objects Ross, out of every 1,000 men of corresponding age in California, there are only 7 deaths annually, regardless of marital condition. The mortality score at the end of the year stands: Chicago, 24 deaths; California, 7 deaths.

There is gold excitement in the Camp Meeker section of Sonoma county. It was revealed that gold in paying quantities had been unearthed in a ledge on land back in the hills recently purchased by Mrs. F. S. Morgan of San Francisco and a tunnel is being built to thoroughly expose the deposit and plans for gold mining are in progress. It was stated that old-time mining prospectors, discovered the gold last April, but the discovery has been kept a secret until now.

High temperature, high wind and low humidity, forest fire weather, settled down on the northern part of the state recently and resulted in five costly timber and brush fires, the worst and most threatening sweeping through thousands of acres of wood and pasture land along the California-Oregon line in Siskiyou county. Reports to the United States Forest Service office in Sacramento recently described the Siskiyou county fire as one of the worst in years.

Sixteen students of the Division of Forestry at the University of California are now in attendance at the Summer camp maintained by the university at Meadow valley in Plumas county. Here for the next twelve weeks the students will receive practical training in measurement of tree growth, estimating of timber stands, making timberland maps, locating logging railroads and such other items as will fit them to become managers of forest lands.

Ranchers from all sections of Sutter county and many residents of Yuba City, and Marysville drove to the ranch of A. W. Goetz, near Oswald, to view a Shetland pony born there. The pony, weighing only 12 pounds is said to be the smallest of the equine family ever born in Sutter county. Despite the fact that it is smaller than the average dog, the little horse is unusually lively, while a veterinarian declared the animal is perfectly sound.

A pair of leather puttees saved Claude L. Hubbard of Oakland, from being bitten by a rattlesnake. While driving out of Yosemite, unaccompanied, Hubbard stopped to inspect his tires, and while standing by the car, felt something hit his leg. He killed the snake, and then found two great scars in the leather of the puttee, an inch and a half long and an inch apart.

Believe it or not, there are no fish in California so hungry as the catfish of the Sacramento River. Walter Getchel of Sacramento, at a single cast of his angling line, has proved this by catching two of them on one hook. He claims the hook passed through the gills of one victim and truded sufficiently beyond to catch the second fish in the side of the head.

Southern California is winning an enviable reputation as a fur--production center, according to reports from Walnut Acre farms, in the western San Fernando valley. More than 200 rabbits are soon to be established in new homes at Walnut Acre farms, principally Chinchillas, imported directly from England.

The Durham State Land Settlement Colony, near Chico, now boasts 151 settlers and is proving a definite financial success, according to a report filed in Sacramento. Settlers have already devoted 500 acres to fruit in addition to larger areas planted to other crops. They have invested $812,879.98 in land.

A new California institution of higher learning, the Scripps College for Women, was incorporated at the office of Secretary of State Frank C. Jordan, and announced it will begin operations at Claremont, Los Angeles county

The 1927 convention of state and municipal purchasing agents will be held in Sacramento.

An effort is being made to establish a company of United States Marine reserves in Marysville.

The contract for the new $350,000 Elks' club in Santa Monica has been awarded and work will start immediately.

August 1 should see the new $100,000 plant being built by the Golden State Milk Products company in operation at Merced.

The canning plant of the United States Products Corporation, at San Jose, was destroyed by fire recently with a loss estimated at $25,000.

At the present time approximately 10,500 voters of Butte county have registered for the August primaries. Of this number nearly one-half are registered from Chico.

Ground has been broken for the erection of two new hotel buildings in Brawley, Imperial county, that provide a total of 194 guest rooms and cost the builders over $400,000.

Work is under way on the $15,000 wing to the A. K. Smiley library, at Redlands, which is to provide more room for files, for cataloguing, a room for assemblies and so on.

The Imperial valley pure seed association has been formed with Scott B. Foulds, Jasper, president; Henry Wood, Holtville, vice-president, and J. R. Snyder, Holtville, secretary.

Lindsay now has a population of 3,500, an increase of 167 since the last directory was made, state publishers of a San Joaquin valley directory who have just completed a new census of the city.

The new plant of the Riverdale-San joaquin creamery at San Joaquin has just been completed at a cost of $75,000 and is being operated in conjunction with the big co-operative creamery at Riverdale.

With 1926 building permits to date already exceeding those for the like period of 1925 by approximately $200,000 Ontario, San Bernardino county, promises to break all former annual construction records.

Red Bluff is already making plans for a big reception to be tendered to delegates to the State American Legion convention as they pass through the city on their way to Yreka, the meeting place, in August.

Two thousand dollars was appropriated by the board of supervisors of Yolo county, as a fund to establish and maintain a competitive booth and display in the 1926 California State Fair to be held at Sacramento.

The annual convention of the California Association of Mercantile Agencies, will meet in Petaluma on July 23, 24 and 25. It is expected that 200 delegates will be entertained. Practically all the cities in the state will be represented.

Formal dedication of the monument erected to the memory of General E. R. S. Canby and other officers and men who perished in the Modoc Indian War of 1872-73 took place on the old battlefield in the Modoc Lava Beds near Alturas, recently.

The Dinuba Grape growers associatino is one of the strong and ably conducted co-operative fruit handling institutions of the Alta District. It is co-operatively owned and conducted by growers of the Dinuba district, and all profits go to the growers.

Plans have been drawn for the erection of a 100x55 foot addition to the grammar school at Dixon, Solano county, to provide needed room. The addition will consist in the main of an auditorium and stage suitable for class and winter play purposes.

The Lindsay-Strathmore Irrigation district has hung up an offer of a reward of $1,000 for information leading to the arrest and conviction of the person or persons who dynamited the Lindsay-Strathmore pipe line on the Ranch De Kaweah a short time ago.

58-pound bass, said to be the largest fish caught in the Russian river during recent years, was landed at Duncan Mills, by Bob Kelly of Monte Rio. While Kelly was struggling to land the big fish, Newt Kerr, who was fishing near by, hooked a 30-pounder.

Woodmen of the World from Oakdale, Stockton and Turlock demonstrated that they were real "woodmen" when they built a house for one of their sick brothers in less than a day. The four-room cottage was built for E. L. Shaw, on his ranch just outside of Ripon, San Joaquin county, and it was completed within less than eight hours. About forty of the Woodmen assisted in the construction work, and built the cottage from the ground up.

Declaring their willingness to spend $100,000, if necessary, to thoroughly test the territory into which they have entered on their own initiative and upon their own geologists' reports, Signal Hill oil operators with Long Beach capital are moving machinery and a crew of fifteen men upon the property of the Neame Oil company, seven miles north of Visalia, prepared to begin operations within a short time and to go to 5,000 feet, if necessary, utilizing the existing 1,800-foot hole which stands cemented off.

According to reports, cantaloupes in the Turlock Irrigation district are in advance of the crop at this time last year. The cantaloupes planted and above the ground before the April rains have made wonderful progress and growth. The fields cultivated and replanted after the storms are showing good stands but are not advancing as fast as the other fields. Watermelons, casabas and honey-dews are making a splendid showing, especially the watermelons. The present estimate of the crop is that it is in 25 per cent better condition than last year.

IN MEMORY OF CUSTER

On the historic ground where General George A. Custer and his heroic troopers of the Seventh U. S. Cavalry fought and died to the last man in battle with an overwhelming force of Sioux and Cheyenne Indians on June 25, 1876, a notable tribute to their heroism and sacrifice will be paid on the fiftieth anniversary of their death.

Four troops and the regimental band of the present Seventh Cavalry will join three thousand Sioux and Cheyennes in commemorating the valor of white and red warriors in that engagement. A few surviving Indians who fought there fifty years ago will participate, also a few American soldiers who took part in other battles of the Indian campaign of which Custer's last fight was the most conspicuous incident.

Custer's command numbered 212 officers and men when he attacked the Indian village, which he evidently supposed to be much smaller than it proved to be. He shortly found himself surrounded by 5,000 or more warriors, armed with repeating Winchesters, while the cavalrymen had only single-loading carbines.

The Indian Department and the War Department had not been in accord with respect to a policy in dealing with the Indians, and Custer's men faced rifles supplied to the Indians by the government.

Many conflicting tales regarding the Battle of the Little Big Horn have been current during these fifty years, as was inevitable, because not a single man of Custer's force remained alive to tell the story from the cavalrymen's standpoint.

But the main fact is that 212 American soldiers of the Seventh Cavalry gloriously fought and died on that wild Montana hillside within one brief half-hour on June 25, 1876.

It is appropiate that this heroic sacrifice is to be commemorated with fitting ceremonies on its fiftieth anniversary.

ANOTHER INVESTIGATION

Bills intended to serve some constructive purpose quite frequently encounter determined opposition and meet defeat in the congress of the United States. But a resolution calling for an investigation of something almost invariably has easy sailing. There appears to be no limit to the amount of money congress is willing to spend for investigations.

This was forcibly brought to the attention of the Senate a few days ago by Senator Harreld of Oklahoma, who opposed a resolution calling for an investigation of the oil industry. He stated that he had no objection to the investigation, except on the ground that it would entail a useless expense to the government.

Senator Harreld enumerated a number of investigations ordered by the Senate, with the amounts spent for each, showing that these had cost $3,332,593 in the past eleven years, with practically no beneft to anyone. This amount does not include the Teapot Dome investigation, or those made by the Federal Trade Commission and the several executive departments of the government.

Of course, the cost to industries and firms under investigation was enormous, in addition to the cost to the public.

While there could be no legitimate objection to an investigation based upon tangible evidence of its necessity, these are usually ordered on the merg suspicion of some member that something wrong possibly may be brought to light. Often it appears that a Seantor is merely seeking a little notoriety for himself through demanding that something or somebody be investigated.

Of course, the oil investigation was ordered, although more than $200,000 has been spent by the government in six former investigations of that industry in the past ten pears, with no benefit to the taxpayers who paid the bill.

THE JUDGE MAY BE RIGHT

Circuit Judge Morrow, of Portland, Oregon, recommends the increased use of electricity as a cure for domestic unhappiness that so frequently ends in divorce. He says that a washing machine, a vacuum cleaner, an electric fan, a toaster, and other electrical conveniences and time-savers now so easily procurable, turn domestic drudgery into interest or real pleasure, and so remove the one great cause for quarrels.

Now they have invented a conception whereby a man without vocal cords may sing. A more useful device would be one to fix a man with vocal chords so he couldn't.

GETTING INTO A RUT

Owing to the growing tendency toward specilization in every department of human activity, it is becoming more difficult for the average man to keep in touch with what is going on outside his own immediate interests. He becomes so engrossed with his special line of work that he runs a great risk of getting into a rut.

While the exactions of modern business and professional life lead necessarily to a higher degre of specialization, they should not be permitted to unduly restrict one's mental horizon. Everyone should take sufficient time to keep abreast with important developments in the world about him. By so doing he willl often encounter ideas which will be of practical benefit in his own sphere of effort.

Above all, he should lay aside routine duties frequently for the purpose of indulging in systematic thinking. Many men are able to evolve their best ideas in some quiet spot away from the scene of their daily labors.

Whatever may be the details of any method adopted, a portion of one's time should be devoted to sound reading covering varied subjects. Otherwise he will inevitable get into a rut. And getting into a rut is bad for his intellect and bad for his business.

NOTED VETERAN DIES

Major General Charles F. Humphrey, retired, who died in Washington on June 4, in his eighty-second year, was one of the outstanding American soldier of his generation.

Entering the army as a private at the age of 18, he had more than forty-four years of continuous service to his credit when he was retired from active dutty in 1907. He had participated in the Civil war, in many Indian campaigns, in the Spanish-American war, in the Chinese relief expedition, and in action in the Philippines.

He won his Congressional Medal of Honor "for most distinguished gallantry in action at Clearwater, Idaho, July 11, 1877, when he voluntarily and succesfully conducted, in the face of a withering fire, a party which recovered possession of an abandoned howitzer and two Gatling guns lying between the lines and within a few yards of the Indians, while serving as first lieutenant, Fourth U. S. Artillery."

In the Spanish-American war he was chief quartermaster of the Santiago expedition, and he was chief quartermaster of the army from 1903 until 1907.

He gave five sons to the service of the United States, of whom two are colonels in the army, one is a major and another is a lieutenant in the Marine Corps, one is a captain in the Merchant Marine.

Few soldiers ever had a longer or more distinguished career than General Humphrey, and he richly deserved the high rank and exceptional honor bestowed upon him.

LIGHTNING AND RADIO

Lightning has no especial affinity for radio antennae, and radio operators need have no special fear during thunderstorms, say engineers of the Underwriters' Laboratories, who have conducted an amazing series of tests in radio safety.

"Lightning is hard to check," says one of the engineers. But more men are lightning-struck out under trees than in any other way according to unofficial statistics. One might indeed be a target at the end of a properly insulated radio set; but no more so than at the keyboard of a piano, or with knife and fork in hand at the dinner table, or patting the keys of a typewriter.

David Sarnoff, vice-president of the Radio Corporation of America, predicts that moving-talking pictures may soon be shown in every home by radio. He says the only problem is speeding up transmission of still pictures, and that research engineers are hard at work perfecting the speed-up attachments.

HOME LIQUOR HELD ILLEGAL

For the first time since prohibition became effective, a higher state court has ruled that it is unlawful to possess, even for home consumption, liquor acquired subsequent to the passage of the Volstead act.

This decision was handed down on June 17 at Sacramento by the Third District Court of Appeal, when it affirmed the conviction of Joe Avila in the Stanislaus county Superior Court, on a charge of having liquor in his home. Avila was fined $600.

According to this decision it is unlawful to have liquor in you home.

THE CREATIVE SPIRIT

The United States has been "accused" of being the richest nation on earth. Some foreign comment has been made to the effect that money is all we care for. This is a mistaken viewpoint. The reason this nation is not only rich, but great, is simple. We all work over here. Not only do we work, but we make everything else work for us. We enjoy producing something useful.

Here in the United States we use forty times as much mechanical power as human power. In China, Russia and India they use from two to four times as much human power as mechanical power. That is the reason America is rich, and that is the reason wages are high and opportunities great in this nation. High production per man tells the story of our high wages, short hours and modern conveniences in every home. If the rest of the world would try to follow our example there would be more happiness and less cause for wars and discord.

ARE YOU LIKE A BOOK?

Most men are like a book. They constantly give expression to the same thoughts. They add no new chapters to their lives. Read them backwards or forwards they say the same thing.

They wonder why it is that their progress is so slow. It rarely occurs to them that they have allowed themselves to become as books. They have been diligent in their efforts to advance, but it has been along the same old beaten paths, the lines of least resistance.

A wise man abhors the idea of becoming a book. He has no vainglorious desire to go on record. He has no wish to be bound by precedent. His resolve is to maintain an unbiased mind in order that he may decide upon each new issue according to the complexities of the occasion.

Many believe it to be a mark of weakness to forsake a long-established opinion. They hold some opinions so long that they eventually come to look upon them as facts. But a fact today often becomes obsolete tomorrow. Absolute truth alone is unchangeable, but no man is ever likely to attain this goal.—J. H. Barringer in Forbes Magazine:

ELECTRICAL GAINS

According to a government report made public recently, industrial conditions are more satisfactory than in either of the two preceding years, this conclusion being based primarily on the increased use of electricity.

It is recognnized that the amount of electrical energy produced and used is one of the best barometers of general industrial and business activities.

For the first four months of 1926 there was 12 per cent more electricity generated than in the same months of 1925, and about 18 per cent more than the output for the corresponding period of 1924.

In April of this year, which is the last month for which complete figures are available, the total production of electricity by public utility plants in the United States was 5,784,532,000 kilowatt hours. Of this 2,315,369,000 kilowatt hours were produced by water power and 3,469,163,000 kilowatt hours by plants using fuels.

The excellent showing which is being made by the electrical industry is doubly encouraging, as it indicates the ability of American industry to absorb an ever-growing amount of electrical energy, as well as the increased capacity of electrical plants to supply this indispensible element of industrial progress.

THE SEASON'S BRIGHTEST

Of the many thousands of high school graduates who have received their diplomas this year, New York claims the brightest in the person of Ellen Elizabeth Benson, who has finished her work prepatory for college at the age of 12.

Several stories of her precocity are told. At eight months she startled a physician who was examining her in a health contest by saying "Baby wants dinner." At 16 months a psychological test showed her to have a vocabulary of 159 words. At 3 years she could read, although no effort had been made to teach her. She is now declared to have the mental capacity of a girl of 19.

All these accomplishments would naturally convey the impression that Ellen Elizabeth is an indefatigable student and worker. But let her tell about that for herself:

"No, I don't like to study. I just read and remember. And I'm lazy about housework. Just ask mother."

ONE ON THE SCOTCH

Ikey and his wife went to the clothing store to buy Ikey a suit of clothes. After inspecting a number of suits, Ikey found one to his liking, the price of which was $75, and, of course, Ikey thought that was too much money for the suit.

After arguing the matter of price for quite a while, the clothier said, "It will take $75 to buy that suit."

While Ikey was hesitating, his wife spoke up and said, "Oh, Ikey, give the man his $75. Don't be so Scotch."

It's hard to get a concrete idea through a concrete head.

"SAFETY FIRST" ON RAILROADS

A belief has prevailed that more people are killed and injured on the railroads of the United States than is the case in Great Britain. However, official figures for 1924 prove that travel by rail in the United States is safer than it is in Great Britain.

Charles F. Carter, historian of railroads, calculates that if as many passengers per train-mile were killed in this country as in Great Britain, our total loss of life would be 278 annually, while in reality it is only 41. One American passenger is killed for every 242,220,714 miles of travel. One British passenger is killed for every 124,904,273 miles.

The railway "safety first" campaign has made ours the safest railroads in the world.

ARE YOU AN ALMOST?

Size yourself up. Are you on the level with yourself? Isn't your self-confidence ahead of your energy and fight? Ninety per cent is a fine mark for a boy to make at school—but it's no mark for a man in the school of life. Ten per cent more effort would put us over the top, but we stop short and call it a day.

Let's quit fooling ourselves.

There's no fun in being an "Almost."—Exchange.

THE STINGY MILLIONAIRE

Here's a true story about a stingy millionaire, which comes from Milwaukee. The veteran John I. Beggs, worth many millions, was so careful of his pennies that for years he wore a derby hat which had turned green and dilapidated with age. But no amount of joshing by his friends could move him to buy a new one. Finally they decided to play a prank. He was scheduled to make a talk at a little gathering, and while he was on his feet his old hat was slyly placed on his chair. When he sat down he crushed it hopelessly. With the tenderness of a mother picking up an injured child, he lifted the hat and pathetically began to try to massage its wounds. He looked the picture of despair. Then, with some ceremony, they presented him with a costly new hat. This partly assuaged his sorrow

Next morning he went to the store where the hat had been purchased, exchanged it for a cheaper one and pocketed the difference.

NEEDED CO-OPERATION

The yardmaster was interviewing an Irishman wha had applied for a job as a motor-bus driver.

"Can you drive a car?" asked the yardmaster?

"Can Oi drive a car?" repeated the Irishman, scornfully.

"Well, suppose you run the bus into the shed."

Pat climbed on to the trembling vehicle. He looked around, grabbed the biggest lever, and pulled it for all he was worth. Zip! she went into the shed. Pat saw trouble ahead and, guessing what would happen reversed the lever. Out she went; then in again.

"I thought you said you could run a car," said the yardmaster.

But Pat had an answer ready. "Oi had her in three times. Why didn't you shut the door?"—Forbes Magazine.

SAME PREDICAMENT

The young couple had gone to church. When the collection was taken up, the young man hurriedly explored his pockets and finding no money, whispered sheepishly to his sweetheart:

"Mary, I haven't a single cent. I changed my pants before I came here. What'll I do?"

Mary was searching her bag in hopes of some small change, and at her wits' end, she blushed a rosy red when she replied: "Do you know, John, I'm in the same predicament myself."

IT PAYS TO ADVERTISE

The codfish lays a million eggs,
And the helpful hen lays one,
But the codfish doesn't cackle,
To tell us what she's done.

And so we scorn the codfish coy,
And the helpful hen we prize,
Which indicates to you and me
That it pays to advertise.

There is no joy ride like a slide down the banister

NOTICE TO CREDITORS

No. 3856.

In the Superior Court of the State of California, in and for the County of San Mateo.

In the Matter of the Estate of Louis Lagomarsino, Deceased.

Notice is hereby given by the undersigned Alice Lagomarsino, executrix of the last will and testament of Louis Lagomarsino, deceased, to the creditors of and all persons having claims against the said deceased, to file them, with the necessary vouchers, in the office of the Clerk of the Superior Court of the State of California, in and for the County of San Mateo, or to exhibit the same, with the necessary vouchers, within four (4) months after the first publication of this notice, to the said executrix at the law offices of J. E. McCurdy, Wisnom Building, San Mateo, California, the same being the place for the transaction of the business of said estate in the County of San Mateo, State of California.

Dated this 18th day of June, 1926.

ALICE LAGOMARSINO,
Executrix of the Estate of Louis Lagomarsino, Deceased.

Colma News Notes

By SYLVIA HAUBRICH FISCHER

Miss Rosa, Bauer, of Price street, spent last Friday in San Francisco.

Mr. and Mrs. Edwin Cuneo visited at the Selmi home Friday evening of last week.

Mrs. Louis Merlo and Mrs. Ellard Gouin spent Wednesday of last week in San Francisco.

Miss Florence McKendrick has returned from an enjoyable vacation spent at Guerneyville.

The dance given in the Colombo Auditorium by the Colombo Mutual Benevolent Society was well attended.

Mrs. Louise Merlo, of the Olcese apartments, had as her week end guest Miss Edna Delucci, of San Francisco.

The drill team of El Carmelo Parlor No. 181, Native Daughters of the Golden West, will meet in the Daly City Auditorium every Friday evening, commencing this week. All members are requested to attend these meetings. Mr. Fred Collins is in charge of the drilling.

Miss Norma Wight, daughter of Mrs. Katherine Wight of Lawndale, was married at the Parochial home on Wednesday afternoon to Mr. E. Steinberger, the ceremony being performed by Father Schenone. The young couple are spending their honeymoon in Los Angeles.

Mrs. Ellard Gouin, of Mission street, tendered her husband, Ellard Gouin, a surprise party in honor of his birthday on Friday evening of last week. Games and dancing to radio music were enjoyed until a late hour, when a delicious spread was enjoyed. The table was attractively arranged with flowers and dainty favors. Among those present were Mr. and Mrs. Louis Merlo, Mr. and Mrs. Sam Martinelli, Mrs. Benson Gouin, Mr. and Mrs. Ellard Gouin, Misses Margaret Grady, Isabelle Silicani, Louise Silicani, Evelyn Ferrari, Messrs. George Krehl, A. Checci, Bill Nessano, Henry Bortis, Harold Varni, John Bianchi.

Mrs. Al. Zanetti, of Vale street, spent Tuesday afternoon in San Francisco.

Miss Evelyn Ferrari, of San Rafael, spent the week end with her sister, Mrs. Ellard Gouin.

Messrs. Louis Merlo and Romeo Lagomarsino motored to Plymouth for the week end.

John Butler, of South San Francisco, was a Colma visitor Wednesday afternoon of last week.

Mrs. Annie Biggio, Mrs. Edward Bocci, Miss Ruth Biggio and Henry Biggio motored to Half Moon Bay on Thursday of last week.

Mr. and Mrs. Henry Lorenz and daughters, Misses Alice and Helen Lorenz, are enjoying a delightful vacation at Rio Nido and Clear Lake.

Mrs. Annie Biggio and children, Ruth and Henry Biggio, of San Pedro avenue, left last Saturday for Fairfax to spend their summer vacation at their home there.

Grand Trustee Josephine T. Johnson and Delegates Sylvia Fischer, Thelma Selmi and Laura Figone are representing El Carmelo Parlor No. 181, Native Daughters of the Golden West, at the Grand Parlor convention which is being held at Sacramento. Headquarters are at the beautiful Hotel Senator.

Miss Annette Lucey entertained the members of La Fiesta Social Club at her home in the Crocker Tract last Friday evening. After the business of the evening, piano and vocal solos were enjoyed by the girls until a late hour, when a delicious spread was served. Miss Lucey received many compliments on her delicious baking. Those present were Margie O'Connor, Margaret Varni, Florence McKendrick, Rosa Bauer, Annette Lucey, Sarah Battaini, Callista Dalton, Lorraine Wall, Louise Segale, Thelma Selmi, Tessie O'Connor, Grace Johnston, Ruby O'Connor, Christine Hume and Sylvia Fischer.

Mr. and Mrs. William Sweeney have returned from an exciting motor trip to Yosemite and Hetch Hetchy and the high Sierras. The return trip was made over the Tioga Pass, during a heavy rain and snow storm. The road was completely washed out in a number of places and the rising streams had to be forded. The night was spent in a ranger's cabin, as further travel was impossible, and an early start brought them to Lake Tahoe the same afternoon, returning home through Placerville on the Lincoln highway. Mr. and Mrs. Sweeney enjoyed the unusual adventure, and the marvelous scenery, and report that they believe in seeing California first.

Small Boy—"Dad, the barometer has fallen."

Father—"Very much?"

Small Boy (with guilty look)—"About five feet—it's broken."—London Tit-Bits.

The limit of Job's patience was never reached. Nobody ever told him to cheer up.

"My time has scum," remarked the fellow when he dropped his watch into the frog pond.

"Strike one," said the baseball fan, as he tried a wet match; "Strike two, strike three—you're out."

Poets are born; politicians are grafted.

WHISTLE AS YOU HIKE!

"Though the road may be long,
In the lilt of a song
I forget I was weary before."

The Excelsior Ranch's rich, creamy milk will refresh and sustain you during the longest hike.

RACING MEASURE IS GIVEN ENDORSEMENT

Not only has all of California, both Southern and Northern, but also the United States as a whole given its endorsement to the restoration of racing in this state, in which the first moving pictures of the thoroughbreds ever was taken, according to special adivces to the racing board campaign committee.

Here is the way the Morning Telegraph of New York received the news from California concerning the initiative measure that, in addition to permitting the pari-mutuel wagering system within the track enclosures, limits the profits of all racing associations to 9 per cent a year on capital invested, with the balance being equally divided between the Veterans' Welfare Board and the State Board of Agriculture:

"Announcement of this was made to the press by Norman W. Church, president of the Elgin Watch Company, who is visiting the races at Belmont Park as guest of Hamilton Cotton, owner of the La Brea stables. Both are Californians.

"Church yesterday received a wire stating that the bill for racing in the Golden State was ready to be placed on the ballot. He was asked to serve as one of the members of the committee from Southern California. He promptly wired his acceptance.

"A site for a new track near Los Angeles has already been scheduled. A suitable piece of ground on the old 'Lucky' Baldwin ranch, not far from the old Santa Anita track, is available. The Tanforan track, one of the most modern in America, is now available for racing, and its existence assures San Franciscans of racing, providing the bill carries.

"Mr. Church is an enthusiastic turfman. He owns Flagstaff and intends to purchase a large string before winter.

"'We feel sure that a bill thus presented will receive a splendid majority from the citizens of California,' said Mr. Church. 'I am gratifed to state that I have assurances from a dozen of the most prominent turfmen in New York that they will be delighted to race in California—and we can be assured of the finest type of racing if the bill passes.'"

PALO ALTO TO GET NEW CLINIC FOR VETERANS

A diagnostic center where disabled veterans will have their cases analyzed by the foremost physicians and surgeons of California, will be established soon at Palo Alto for ex-service men of the San Francisco district. Announcement of the proposed center was made by Congresswoman Florence Prag Kahn, who arrived in San Francisco Monday to attend Congressman Flaherty's funeral.

Mrs. Kahn has been working for months to obtain such a center, she said, and just before she left Washington she was told by Major William Hines, head of the Veterans' Bureau, that the project has passed every department of the bureau which had to be consulted. It will reach Hines this week, he told Mrs. Kahn, and as it already has his approval, little time will be lost in establishing the diagnostic center at Palo Alto.

ABOUT WOMEN

Judge Florence Allen, justice of the Ohio supreme court, is a candidate for the Democratic nomination for United States senator, opposing former Senator Pomerene.

Hereafter attendance at chapel by young ladies at Vasser, famed women's college of Poughkeepsie. N. Y., will be optional, the student body having protested against compulsory attendance.

Mrs. Josephine L. August of Cassopolis, Mich; Miss Ruby LaVerne Wilson of Washington, Ark., and Mrs. Mary Regina Smith of Fabens, Tex., telephone operators, were recently awarded medals for heroism by the American Telephone and Telegraph Company.

Miss Emily Josephine Smith, 24, daughter of Governor Alfred E. Smith of New York, was married to Major James A. Warner, 39, superintendent of state police, Cardinal Hayes performing the ceremony. Pope Pius XI cabled his blessing from Rome.

Miss Marie L. Thomas of Auburndale, Mass., was selected from among 1,000 girls by Artist Richard Andrew to pose for a painting of John of Arc.

In the recent Confederate reunion parade in Birmingham, Mrs. Watt T. Brown drove her automobile with her father, Judge John W. Inzer, last survivor of the secession convention of Alabama in 1861.

Miss Celeste J. Miller of Chicago, aged 80, has just returned home after completing her thirty-first trip around the world. She has in her lifetime traveled more than 900,000 miles.

Miss Joycette Jones, 16, one of the princesses at the annual convention of Oklahoma Indians at Pawhuska, Okla., this month, is a granddaughter of Mrs. Alice Davis, Seminole leader, said to be the only women chief of an Indian tribe in the United States.

SIDELIGHTS

By Marcy B. Darnall

The Long Island Press is always on the alert to spread glad tidings and solicits co-operation of readers in the following editorial note: "Every birth, engagement, marriage or death is good news. Send the facts to the editor."

This has been a poor year for the lawmakers, as only ten state legislatures have been in session, and the best they could do was to enact 4,100 new laws. In 1925, with 40 legislatures in session, more than 11,000 new laws were passed. How can we ever get along with a measly 4,100 new laws this year?

European hotel porters indicate the tipping habits of their victims by pasting baggage labels at various angels, according to a secret code. This enables the next flunkey to treat the guest with deference or contempt, according to the size of his former tips.

Someone is always confounding the experts. After being told by a soil analyst that his land was unsuitable for potatoes, a Michigan farmer grew 800 bushels on two acres and sold them for $2.50 a bushel.

Commenting on the arrest of a man for obtaining funds "from ignorant and superstitious people by exhibiting a device which he calls a telephone," a New York editor once wrote: "Well informed people know that it is impossible to transmit the human voice over wires." But that was more than 50 years ago.

Chinese evildoers are faced with new terrors. The Peking government has ordered that all prisoners must take a bath once a week and wash their clothes every ten days.

A geologist declares that the North American continent is sinking into the sea an inch every twenty years. At that rate in the course of a few thousand centuries a future Noah will have his opportunity to win lasting fame

Study of 300,00 cases of personal injuries discloses that the various parts of the body suffered according to the following percentage: Arm and hand 53 per cent: leg and foot, 28; trunk, 8; eyes, 6; head, 5. Injuries to the trunk do not include those inflicted by baggage smashers.

In bidding a departing couple farewell with good wishes, a Wyoming newspaper said: "Here's hoping they will like their new home and stay a long time."

Ethelbert Stewart, 69, commissioner of the federal bureau of labor statistics, believes that young people should be unmolested if they want to carry on courtship in the public parks. Of critics of the young he says: "They are like dried-up, wormeaten apples in the celler, growling at the blossoms on the trees." The aforesaid young people will agree with their sage friend.

With keen insight into the intent of the law an Irish official taxed a neighbour $4 for a goat. Upon remonstrance by the owner, the official pointed out the statute: All property abutting on the public street shall be taxed at the rate of $2 per front foot." The hind feet were tax free.

COLORS IN GREASE

Lady (to Clerk)—"I want to buy some lard?"

Grocer—"Pail?"

Lady—"I didn't know it came in two shades."

Estelle—"Jack has one of those old-fashioned drinking mugs."

Hortense—"Oh, I think he is quite good looking."

"How'd you ever get the idea that rabbits have indigestion?"

"Didn't you ever hear of a belchin' hare?"

Flapper—"That horrid millionaire stole a kiss. What can I sue him for?"

Lawyer—"Sue him for petting larceny."

To err is human. Only one man was ever perfect—and he was sorely tempted. Don't look back and don't dodge. With every error safely under yesterday's sod, the wise man and woman wipes away the tear and bravely faces the front. It is only the idiot, anyway, who eats his heart out for what can not be undone.

THE VERY IDEA!

Nell—"When you went down for the third time, did all your sins come up before you?"

Bell—"Good heavens, no! I wasn't in the water more than half an hour."

This year 100,000 more automobiles are registered in California than in 1925. That shows prosperity and, what is more important, HAPPINESS. Some time ago, when all the world used fewer automobiles than are now in California alone, men talked about automobile "saturation." There never will be saturation until every family has at least one automobile, as it should have, and then it will be necessary every few years to manufacture twenty-five or thirty million new ones to replace the old. Get YOUR car now.

We don't see why Texas makes so much noise about having a woman governor; every man up North has one to himself.—Sea Bag, U. S. S. Oklahoma.

Another paradox is that when a thing is swallowed up it goes down.

EAGER SHOPPERS THRONG STORES

Salesgirls Dread Bargain Days

Louisa was tired. From morning until night she had been on her feet in the busy department store. No matter how she felt, she must serve her customers with a smile. Her head throbbed and her feet ached. Week after week, she felt her strength ebbing until she was in a run-down condition, not fit to work.

"My mother suggested that I try Lydia E. Pinkham's Vegetable Compound," she writes. "I took only three bottles and it brought me about all right." Through the Vegetable Compound, she found better health to do her work and she told the other girls about it.

That was several years ago. Louisa is now Mrs. L. G. Van Dyke of 1246 Spring St., Morrell Park, Baltimore, Md. She is the mother of three healthy, active children. She says that she found the tonic effect of the Vegetable Compound helpful to her during this critical period.

Every working girl knows that to do her work properly and easily she must have good health. She can not afford to lose time from her work.

Girls who suffer from weakness and run down condition should try Lydia E. Pinkham's Vegetable Compound.

Ask your neighbor.

The Ayes Have It

"The queen of Spain has begun a campaign to bring back the ankle skirt and the long sleeve, but I'm afraid she's going to be defeated," Jean Patou said to a New York correspondent.

He added with a chuckle:

"A world vote on the question, 'Shall girls continue to wear knee skirts and no sleeves?' would be bound to result in a victory for the eyes."

Acid stomach, heartburn and nausea are corrected with the use of Wright's Indian Vegetable Pills. 372 Pearl St., N. Y. Adv.

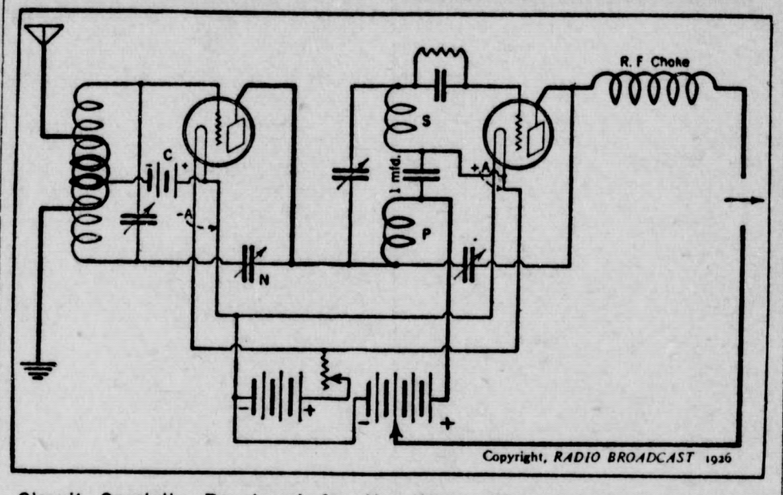
RADIO



Circuit Specially Developed for Use With a Toroid Coil as Radio Frequency Coupling Device.

We have seen and heard a great deal about the toroid coil during the last few months, and much space has been devoted to the publication of data for the inclusion of these coils in already existing circuits. Few writers have gone to the trouble of describing circuits which have been especially designed to make use of the toroid inductance, however. The Radio Broadcast Magazine's "Lab." circuit is one of the few examples where special attention has been paid to this matter. A series of articles on the "Lab." circuit appears in the Radio Broadcast Magazine, from the pen of Keith Henney, the director of the laboratory of that publication.

"The great advantage of the toroid coil," he says, "lies in its restricted field. This means that energy from the coil is not likely to expand about the coil itself and interlink with other fields, and by the same token it is difficult to get energy into the coil. For this reason a circuit in the neighborhood of powerful broadcasters is not so likely to be disturbed by local signals except those arriving at the receiver through the proper means—the antenna. The fact that the field is restricted indicates that the coils may be placed closer to metal end plates of condensers, closer to wires carrying radio frequency currents of wrong phases, and even closer to each other without the many troubles incident to interstage coupling.

The Advantages.

"The use of toroids makes possible the conservation of space, the maintenance of the resistance of circuits at their lowest point, the reduction of 'pickup' from external sources, the prevention of interstage coupling by stray electromagnetic fields, and naturally makes neutralization of high-gain amplifiers a much simpler problem. All of these things are possible, of course, provided that proper precautions are taken, and provided that the experimenter does not play with an inherently unstable or unbalanced circuit."

In the circuit diagram which is reproduced here the toroid coil is employed as an interstage coupling device, and is shown as P and S. The ordinary primary of the toroid is left disconnected, the P and S as marked on the diagram consist of the secondary winding of the toroid divided. "Determining the proper place to tap the coil is a question of utmost importance, and the correct ratio of the P and S windings is found by the following formula," writes Mr. Henney:

$$N = \text{Sq. Root of } \frac{55{,}000}{Rtp}$$

In the formula N is the turn ratio, while Rp is the plate impedance. The plate impedances of various tubes, with 90 volts on the plate and a negative 4.5-volt bias on the grid, are as follows:

Type Tube	Impedance	Turn Ratio
12	18,000	1.75
199	22,400	1.57
201-A	13,000	2.00
112	6,000	3.00
High-mu	30,000	1.35

(90 volts B, 1 volt C)

Not a Difficult Operation.

Neutralization in the Radio Broadcast "Lab." circuit is accomplished by the Rice method, and this is not a difficult operation if due care is exercised. It is best for the fan who intends seriously experimenting with the "Lab." circuit to start with a type 199 tube, for this latter will be found easier to neutralize than the 201-A type. Those fans who have tried a 201-A in the Browning-Drake will readily agree on this point.

By reference to the circuit diagram it will be noted that the secondary coil of the antenna tuning circuit has a center tap. It is important that the tap be taken more or less exactly at the center turn, otherwise trouble will be encountered in the neutralization process.

The size of the various tuning condensers employed depends on the coils used. The standard coils usually take a 0.0005-mfd. tuning condenser. The condenser connected across the primary and secondary of the toroid coil has a maximum capacity of 0.00025 mfd. The one connected from the plate of the detector tube to the primary of the toroid coil is the regeneration control condenser, for the capacity feedback system is employed. It is a 15-plate midget condenser. The ordinary three-plate neutralizing condenser will be found satisfactory for N. Any satisfactory tuner may be employed in the antenna circuit. A Samson choke coil was found satisfactory in the plate circuit of the detector tube, but this may be wound at home if necessary. The output, which may be connected to any good audio amplifier, is indicated by an arrow on the diagram.

"C" Battery One of Most Valuable Accessories

The "C" battery is very often disregarded in wiring up radio receivers. Whenever this is done one of the most important parts of the entire receiver is omitted. Its true worth in the circuit is not generally appreciated, but the fact is that the "C" battery pays a greater dividend in money saved and satisfaction given than any other accessory or part of the receiving system. It increases the operating life of the "B" battery, it increases the amplification of each tube in the circuit, it makes possible the use of higher plate voltage, it increases the load-carrying capacity of the tubes, it greatly reduces distortion from overloading, and it improves the quality of the output of the receiver. And all these things the little "C" battery accomplishes without itself furnishing any appreciable current, so that all are practically obtained without cost.

From an economical point of view the greatest gain derived through the use of a "C" battery is in the increased life of the "B" battery. For the higher values of plate voltage and with the proper adjustment of the "C" battery voltage, the useful life of the "B" battery is practically doubled. Even with the increased life of the latter a little "C" battery will outlive several sets of "B" batteries. But suppose that it will outlive only two sets of them. Then during the life of the "C" battery two sets of "B" batteries will have been saved. The cost of these saved "B" batteries might have been $12, whereas the cost of the "C" battery which effected this saving might have been only 75 cents, a saving of $11.25. Hence, from this point of view alone it is decidedly worth while to include the "C" battery in the receiver.

But this is not the only advantage. The greater amplification per tube will make the set more sensitive and will bring in more stations, and the increase in the load-carrying capacity of the tubes will give more volume without introducing noticeable distortion. The latter gain results in greatly improved quality of the output, and this is one of the most important advantages of using a "C" battery. Without the "C" battery the tubes will overload quickly and result in harsh quality in the loud speaker; with a correctly adjusted "C" battery and a sufficiently high plate voltage loud speaker volume of pure quality may be obtained.—New York Herald-Tribune.

What Will Be Found Inside "Dry" Battery

A "dry cell" battery consists, briefly, of a cylinder of zinc containing a rod of carbon. Between the carbon rod and the cylinder is placed a mixture of crushed coke, graphite and manganese, this mixture being saturated with a solution of zinc chloride and sal ammoniac. The top is sealed with an asphaltum compound and connections to the carbon rod and zinc cylinder made externally, the entire cell being inclosed in a cardboard cylinder. The voltage of this cell on open circuit is approximately 1.5 volts. This cell becomes rapidly exhausted if required to furnish a continuous current, but is useful in delivering small amounts of current intermittently.

Nickel-in-Slot Radio Among New Inventions

After sixteen months' work Joseph Pinto has completed a unique radio slot machine. When you drop a nickel in, the machine is set in operation so that you can tune in on any desired broadcasting station for a limited time. A red warning light flashes one minute before the time is up. The receiver, says Popular Science Monthly, operates equally well on batteries or house current.

Lead-In Part of Aerial

The antenna lead-in is part of the aerial and should be counted when constructing one having a definite length.

The American Legion

(Copy for This Department Supplied by the American Legion News Service.)

WILL ARRANGE FOR LEGION CONVENTION

Col. Vincent A. Carroll of Philadelphia, national vice commander of the American Legion, was handed a big job recently when the Philadelphia county committee of the Legion named him as chairman of the Philadelphia national convention committee.

As chairman of this important committee Colonel Carrol faces the gigantic task of accommodating any entertaining more than 50,000 American Legionnaires who will attend the eighth national convention at Philadelphia. The Legion national meeting this year will be held in connection with the celebration at Philadelphia in honor of the one hundred and fiftieth anniversary of the signing of the Declaration of Independence.

To assist in the work, Coloney Carroll selected the following Legionnaires as chairmen of the subcommittees to assist him: J. Borton Weeks, parking; Judge J. Willis, Martin, reception and distinguished guests; Miss Anna L. Hawkins, registration and information; Theodore Rosen, decorations; John M. Dervin, transportation; James R. Rose, hotels and housing; James F. Ryan, convention hall and seating; Louis Slepin, badges and trophies; George Wentworth Carr, program; Glendon T. Tongue, radio; Mrs. William H. Beister, Jr., auxiliary, and Virgil Baldi, Forty-and-Eight.

H. Harrison Smith and E. E. Hollenback were elected vice chairmen.

The Legion meeting this year, October 11 to 15, will be replete with historic interest. Among the historic scenes the visiting Legionnaires will see are Independence hall, the Betsy Ross house, Carpenter's hall, the grave of Benjamin Franklin, Old

Col. Vincent A. Carroll.

Christ church and other memorials scattered throughout the city and its environs from Valley Forge to Brandywine Springs.

Colonel Carroll's service in the World War was significant. He attended the first officers' training camp and was commissioned a second lieutenant. Promotions came to him fast overseas with the Seventy-ninth division, and when he was discharged he wore the gold leaf of a major on his shoulders. He is now a colonel in the reserve officers' corps.

His Legion service began when the Legion itself began. He organized a Legion post in Philadelphia in 1919 and served as its first commander. Since that time he has held various offices in the county and state Legion organization. At Omaha in 1925 his Legion service was recognized and rewarded when his comrades elevated him to one of the highest offices in the Legion, national vice commander.

First Raido Unit Has Been Granted Charter

The first radio unit of the American Legion auxiliary was recently chartered at Oklahoma City, Oklahoma Radio Unit No. 300. It is the auxiliary of Radio post of the Legion.

Membership in the unique unit is limited to eligibles who live where there is no live auxiliary unit. It is said ownership of a radio is one of the requirements of membership.

The unit will broadcast weekly meetings and an entertainment program every Monday night from station KFJF (261 meters), Oklahoma City. The unit plans to entertain disabled veterans by broadcasting programs for their benefit.

"Mountain Canaries" Not to Be Molested

Lovers of American "bird" life recently wrote department officials of the American Legion of Colorado protesting the proposed plan of the Legionnaires of Colorado to carry "Rocky mountain canaries" to the Legion national convention at Philadelphia, October 11-15.

It is understood that the Legionnaires have agreed to allow the "canaries" of the Rocky mountains—commonly known as burros—to remain to "warble" in their native Colorado haunts.

FIRST

to develop and use the self-starter

The first practical self-starting and lighting system, the Delco, was invented in Dayton, Ohio, in 1910.

It opened a new era in the history of the automobile, extending its service to women, making night driving safe and *all* driving vastly more comfortable and secure.

Delco was first used by Cadillac, a General Motors car.

The inventor of Delco is today head of the Research Section of General Motors, whose personnel includes scientific leaders in every phase of automotive development.

General Motors operates the largest automotive research laboratories and proving ground in the world. They are added assurance that whatever is *best* and *soundest* in scientific progress will be found in General Motors products.

3 o'clock in the morning – no sleep yet!

INSURE your sleep against the pest of mosquitoes and early morning flies. Spray Flit.

Flit spray clears your home in a few minutes of disease-bearing flies and mosquitoes. It is clean, safe and easy to use.

Kills All Household Insects

Flit spray also destroys bed bugs, roaches and ants. It searches out the cracks and crevices where they hide and breed, and destroys insects and their eggs. Spray Flit on your garments. Flit kills moths and their larvae which eat holes. Extensive tests showed that Flit spray did not stain the most delicate fabrics.

Flit is the result of exhaustive research by expert entomologists and chemists. It is harmless to mankind. Flit has replaced the old methods because it kills *all* the insects—and does it quickly.

Get a Flit can and sprayer today. For sale everywhere.

ALLEN'S FOOT-EASE

THE ANTISEPTIC, HEALING POWDER FOR THE FEET

Takes the friction from the shoe, relieves the pain of corns, bunions, calluses and sore spots, freshens the feet and gives new vigor.

Makes Tight or New Shoes Feel Easy

At night, when your feet are tired, sore and swollen from excessive dancing or walking, sprinkle Allen's Foot-Ease in the foot-bath *and enjoy the bliss of feet without an ache.* Over One Million five hundred thousand pounds of powder for the feet were used by our Army and Navy during the war. Trial package and a Foot-Ease Walking Doll sent FREE. Address,

ALLEN'S FOOT-EASE, Le Roy, N. Y.

DELINQUENT TAX LIST

DELINQUENT TAX LIST OF THE CITY OF DALY CITY, COUNTY OF SAN MATEO, STATE OF CALIFORNIA, FOR THE FISCAL YEAR ENDING JUNE 30, 1926.

All taxpayers are requested to examine carefully the Delinquent Tax List and report errors, if any, immediately.

DALY CITY

NEWS NOTES OF PERSONAL INTEREST

By MARC WORST

Mrs. Ivan Eade is visiting her parents in Texas.

Harold Ross is still at Vallejo, where he is enjoying his vacation.

Mr. and Mrs. P. Ross and daughter Mildren motored to Fairfax last Sunday.

Mrs. P. Ross and Mildred Ross spent Wednesday visiting friends in San Mateo.

Thelma Selmi, of Colma, has left for Sacramento, where she will stay for two weeks.

The Royal Neighbors of Daly City held their last meeting at the home of Mrs. H. H. Smith.

Alice Anderton, aged 7, of 101 Citrus avenue, is on the sick list, suffering from scarlet fever.

Mr. and Mrs. A. Selmi and family spent Sunday at Boulder Creek, visiting Mrs. Facchi, nee Miss L. Selmi.

Mrs. Colvin expects to spend the week end at Walnut Creek.

City Marshal John Doyle left for Santa Cruz on Wednesday.

Mrs. Davis, of Modesto, is visiting her sister, Mrs. Hensley, of Woodrow street.

Messrs. W. Murphy and H. Romeguiere motored to Guerneyville over the week end.

Principal Neil O. Best expects to start next week for a few weeks' vacation on the Russian river.

The "Powhatan" Camp Fire Girls, under their guardian, Miss E. Brown, went swimming at Sutro's last Sunday.

Lily Herschel, who has just been operated on for appendicities, is improving. She is at the Mt. Zion hospital, San Francisco.

Miss E. Brown and Mr. E. Carle will be married at the Grace Presbyterian church at 4 o'clock Saturday afternoon, June 26.

Mrs. H. Warshawski and the twins, with her sister, Mrs. Ginsberg and son, of San Francisco, spent Wednesday at Neptune Beach.

Mrs. Hensley and Mr. and Mrs. Meeks motored to Sawyer's Camp last Sunday, where they joined the large crowd on the California Commandery's outing.

Mr. and Mrs. F. Ford, of 350 Rhine street, who are now in Denver, report there is 14 feet of snow on Pike's Peak, and that the weather is unusually cold.

Laura Bowen and Harry Hutchings will be married at 7 o'clock Saturday, June 26. It is to be a church wedding.

The Community Center church, which meets at Ryan's Hall, plans to have a musical evening Sunday, June 27. The public is invited and all are welcome.

Mr. and Mrs. Brauns and family and Mr. and Mrs. A. Vireno and family motored to Searsville Lake last Sunday. They report having had a most enjoyable time.

The whist given by the ladies of the St. Maximus church in the church hall on Wednesday was well attended. The competition was keen and all seemed to have an enjoyable evening.

Mr. and Mrs. L. Ross and family, Mr. and Mrs. J. Pearlman and family, Jannet Taggart and Bernice Beckner, all of Daly City, spent Sunday at Palo Alto, where they had a most enjoyable picnic.

It is understood a bulkhead is to be put up on the property at the corner of Mission street and Theta avenue, occupied by Jerry's gas and oil station, to insure those living below it of perfect safety.

Another company has seen the advisability of doing business in Daly City. It is the Community Realty Company, which is opening an office at 6398 Mission street, where Pescaro's dry goods store was formerly located.

Although Mayor H. H. Smith is out of town, enjoying his vacation, he extended his congratulations to the Eagles' drum corps, who so ably held up the reputation of Daly City by winning great honors for themselves and Daly City at Yosemite.

Mr. and Mrs. Henry Lorenz and daughters, Helen and Alice, have just returned from Lake county, where they spent their vacation, and report having a most enjoyable time. They traveled by machine and took in all the sights on their trip.

The contractor who is working very hard on the new Daly City park reports that the top bench of the park is to be graded this week. As soon as this is done the board of trustees will be able to decide just how soon further progress may be undertaken.

Alice Parker, of Santa Rosa, and Esther Ehlert, of Burlingame, spent a few days of the past week visiting the Smiths, at 52 Los Olivos avenue. They enjoyed the week renewing acquaintanceship with old friends. Both of the girls claim Daly City as their home town.

Mr. and Mrs. Parker, Messrs. John and Anton Matzek, Bill Hopmann and Mrs. White spent Saturday evening at the home of Mr. and Mrs. H. H. Smith. Mr. and Mrs. Parker came down from Santa Rosa to spend the week end in Daly City, their home town.

A party was given for Miss Evelyn Rancatore on June 23, to celebrate her eleventh birthday. There were eleven girls present, including Miss Rancatore. The home at 99 Irvington street was beautifully decorated in pink and white. The afternoon was spent in playing games, and all those present report having a lovely time.

Mayor H. H. Smith and daughter Evelyn are spending a few weeks' vacation at Walter's Springs, Napa county. It is understood the mayor plans to be in Daly City for a few days next week, to see how the city is getting along during his absence, and to attend to matters connected with his lumber yard.

The whist party given Wednesday afternoon by members of the Mission booth, under the chairmanship of Mrs. Johnson, was a big success. The proceeds of the whist are to go to the Mission booth, which is one of the many booths that is working hard to make the big bazaar at St. Maximus church, which is to be held in August, a success.

Last night the members of Crocker Chapter, Order of De Molay, entertained a large number of their friends and well wishers at a card party at the Masonic Hall. While this is a newly organized Chapter, it is composed of a live bunch of young men and is making excellent progress, being a credit to the community.

A whist party is to be given at Masonic Hall this Saturday evening by Crocker Lodge No. 454, F. & A. M., at which it is expected all members will be present. The proceeds will be used for the success of the anual picnic given by the Masons, which will take place in August at Sawyer's picnic grounds.

Mr. and Mrs. R. F. Wheeler and family, of 130 Willits street, departed last Saturday on an automobile tour that will take them through the northwest and to the East, where they will in all probability make their home in future. Mr. and Mrs. Wheeler will be sadly missed in Daly City, as they were citiezns who were a credit to the community, and they have the best wishes of a large circle of friends who wish them all the best things of this life.

Lita Teel, supervisor of music in Pasadena, is visiting her sister, Mrs. N. O. Best.

Mr. and Mrs. Lithwin, 1252 Brunswick street, entertained Mr. and Mrs. Oscar Allen at dinner last Sunday.

Mrs. H. Rathjen, a former resident of Daly City, became the proud mother of a bouncing boy on June 1.

City Clerk B. C. Ross has returned from his vacation, which was spent on an automobile trip to Portland and other points, and reports having had a wonderful time.

Mr. and Mrs. Oscar Allen, 1246 Brunswick street, entertained friends from San Francisco last Saturday evening, and an enjoyable time was had by all present.

Thomas Spencer, graduate of the Crocker Tract school this year, left for San Diego last Tuesday to spen his vacation. Upon his return he will enter Mission high school.

All butcher shops in Daly City were closed last Wednesday because of the annual butchers' picnic. This year the picnic was held at Saratoga, a large crowd gathering at the Saratoga Auto Camp, where the day was spent in fun and frolic.

Mr. and Mrs. D. T. Bentley gave a birthday dinner for their son, A. R. Bentley, last week at the Stewart Hotel. Those present were Mr. and Mrs. D. T. Bentley, A. R. Bentley, Mr. and Mrs. H. Warshawski and Mr. and Mrs. G. C. Golden.

The many friends of Mrs. A. Gehringer will be sorry to hear that her mother passed away Thursday at Ness City, Kansas. Mrs. Gehringer and daughter Emmarillis were at her bedide, as they have been ever since the beginning of her illness.

At the conclusion of the meeting of Crocker Chapter No. 382, Order of the Eastern Star, last Monday night, a card party was held, there being one of the largest crowds present in the history of the order. Worthy Patron George Riddell was in charge, being assisted by a number of Past Patrons. Refreshments were served following the game, Past Matron Janet Turner being in charge.

Grass is being sown in the front of the Jefferson Union high school, and everyone is asked to refrain from walking on it until it has had a chance to get set. Black soil has been dumped on the athletic field and the field has been scraped and graded. Grass has been planted and everyone is asked to "Keep Off the Grass." A special appeal is made to those who go to play baseball on the field not to do so until the lawn has had a chance to grow.

AN INTERESTING PROGRAM AT THE STATE THEATRE

This Saturday, June 26, the State Theatre will present Ralph Lewis in "The Last Edition," a newspaper story, the scene of which is laid in San Francisco. You should see the humble father, tending the presses, horrified at the story that damned his boy—dazed, half crazed with the humiliation of it, his brawny arm hurled a huge wrench full in the face of the growling press—a scream of metal—a terrific grinding—a blinding explosion—and then absolutely the greatest, the most dramatic fire scenes ever shown in a picture. There will be other interesting features on this bill.

On Sunday, June 27, Harry Carey in "The Prairie Pirate," "Scarlet Streak" No. 9, Kinograms and "The Adventures of Mazie" No. 6.

Monday and Tuesday, June 28 and 29, Rex Beach's "The Goosewoman," with Jack Pickford, Louise Dressler and Constance Bennett," Aesop's "The Lion and the Monkey," and Charlie Chaplin in "A Dog's Life."

Wednesday, June 30, Conrad Nagel and Claire Windsor in "Dance Madness," "Raisin' Trouble" and Universal News. Don't forget Eddie's Adver-show every Wednesday night. Come early. This is proving a very popular feature.

Three big nights, Thursday, Friday and Saturday, July 1, 2 and 3, "The Cohens and Kellys," with George Sidney, Charles Murray and Vera Gordon. An uproarious riot of 1,000 laughs. The finest picture of the year. Also "Step Fast" and Pictorial Proverbss.

Woman Captured in Liquor Raid

Mrs. Mary Byrne, wife of Tom Byrne, now serving a jail sentence on a liquor charge, was taken into custody by San Mateo police during a raid on her home in which the officers were forced to break down the rear door with a sledge hammer. She pleaded guilty to having liquor on the premises and was sentenced to pay a fine of $500.

[This is One of Thirty-two Liberty Bank Branches]

Why This Bank Must Help You!

THE growth and development of the Liberty Bank is dependent upon the growth and prosperity of this community. As you succeed and flourish...the deposits in this bank will grow.

That is why we say "We want to help *You*." There is no false sentiment in it. It is sound, constructive business.

It is, therefore, to *your* advantage as well as ours, that the Liberty Bank is in this community, financing sound enterprise and encouraging thrift. For it is through the resultant growth and prosperity that the community will flourish...and the Liberty Bank with it.

The Liberty Bank operates in this district with a loaning capacity more than ample to meet every legitimate credit demand at any time.

There is every good reason why this should be YOUR Bank, too!
